

MEDOLIV

A complete Liver tonic for Poultry

Liver is one of the most important organ that functions a significant role in metabolism of protein, fat, carbohydrate and has a number of other functions including glycogen storage, plasma protein synthesis, vitamin and mineral storage digestion of food and detoxification of wastes. Liver produces bile, an alkaline compound which aids in digestion, via the emulsification of lipids. It also performs and regulates a wide variety of high-volume biochemical reactions requiring specialized tissues. When the liver is affected due to virus, bacteria or any kind of toxins, the efficiency of the liver gradually comes down resulting, in poor utilization of feed. This leads to low productivity output, frequent disease outbreak and poor FCR in broiler, layer or breeder.

PRODUCT DESCRIPTION: What is MEDOLIV?

MEDOLIV is a combination of Liver extract, Choline Chloride, DL-Methionine and L-Lysine that effectively improve liver functions thus ensuring better feed utilization and improved productivity

MEDOLIV Liq. (Liver Tonic)

Composition: *Each 10 ml contains:*

Ingredients	Quantity	Ingredients	Quantity
Choline chloride	X mg	Niacin	X mg
Liver fraction II/extract	X mg	Ascorbic acid	X mg
Yeast extract	X mg	D-Pantothenol	X mg
Inositol	X mg	DL-Methionine	X mg
Vitamin B12	X mcg	L-lysine	X mg
Biotin	Xmcg	Lipase	X U

Pack Size: 500 ml & 1 liter HDPE Bottle

 245, Paanch Bawdi, Koyna Vasahat, Goregaon East, Mumbai-400063, Maharashtra (INDIA).

Liver stimulants:

Potentiating the liver function. It is also used for treating chronic liver diseases, preventing liver damage and regenerating tissue. It increases the number of liver cells.

Choline Chloride: It plays an essential role in fat metabolism in the liver. It prevents abnormal accumulation of fats by promoting its transport as lecithin by increasing the utilization of fatty acids in the liver.

DL-Methionine: It is used to prevent liver damage in acetaminophen poisoning.

L-Lysine: Improving the meat quality and promoting the growth of animals

The ingredients in MEDOLIV perform multifarious action's, v.i.z., liver cell rejuvenating (Hepato-generative), **hepato-stimulative**, hepato-protective, **anti hepatotoxic** and **positive anabolic effect**, tone up the liver of poultry birds for best performance and productivity. In addition to the **liver tonic** effect. MEDOLIV also exerts beneficial effect on the functioning of spleen, kidney & gallbladder.

INDICATION: Acute fatty Liver and Kidney conditions. Retarded growth in poultry especially in Broilers. Low feed conversion. Reduced Feed intake. Perosis. Aflatoxicosis. Dull flock condition in poultry. Liver enlargement. Cholecystitis & Cholangitis'. Liver cirrhosis & fibrosis. **Advantages of MEDOLIV-P:**

- **Better performance** in terms of body weight, egg production, shell quality, fertility and hatchability.
- Corrects liver dysfunction and liver disorders.
- Rejuvenates liver cells damaged due to aflatoxins.
- Improved livability. Uniform growth

Type	Dosage and Usage	Reasons
Broilers	1 kg/ton of feed, 10ml/100birds,2days/week	To cope up with high density ration helping in better digestion and utilization of dietary fat.
Breeders	1 kg/ton of feed, 25ml/ 100 birds as week a month.	Metabolic stress and even subtle toxicity in breeders can impair production and quality of chicks programme.
Layers	500 gms/ton, 10ml/100 birds as week a month	Improper digestion and utilization of fat can impair the body weight and also egg production

Form: Liquid / Powder

Storage: AT Room Temperature

PRESENTATION: 5 Liter Jar / 25 kg Paper Bag.
